

Appl. No. 09/441,231

Official

receiving information regarding a change in the user's position relative to the display screen;
and

(B) replacing the first image with a second image from the series of images in the display area in response to the change in the user's position.

In addition, please amend claim 10 as follows:

10. (Amended) A method of simultaneously receiving, displaying a single image at any instant and interacting with a series of images in response to movement of an interactive device, said display method comprising:

- (a) receiving for display of a single image at any instant a first image from the series of images;
- (b) receiving for display of a single image at any instant subsequent images from the series of images; and
- (c) permitting viewing of and interacting with the first image while performing step (b) where interaction with the first image is in response to signals from the interactive device.

REMARKS/AUGUMENTS

All claims remain in this application. Claim 1 and claim 10 have been amended.

Claims 1-9 and 25 have been rejected under 35 U.S.C. 103 for being unpatentable over U.S. 5,574,836 (Broemmelsiek) in view of U.S. 5,963,203 (Goldberg et al.).
